Abstract:

Semantica platformei pentru asigurarea evaluării calității și vizualizarea conținutului științific digital din RM (în continuare platforma) este componentă al modelului complet de date elaborat în baza vocabularului semantic CERIF și adaptat (completat) cu termeni specifici sistemului de cercetare-dezvoltare-inovare din Republica Moldova. Scopul documentului în cauză este semantica formală standardizată pentru aplicarea în platformă și descrie entitățile relevante și relațiile dintre acestea. Vocabularul semantic al platformei conține 54 de scheme de clasificare și 352 de termeni de clasificare dintre care 35 sunt termeni noi propuși de grupul de lucru care a contribuit la pregătirea lui.

Statutul documentului:

Documentul în cauză reprezintă versiunea 1.0 al semanticii platformei și va fi dezvoltat în continuare.

Cuvinte-cheie:

Platforma, Model de date, semantica platformei, vocabularul semantic, CERIF

1. Introducere

Semantica platformei a tipurilor și rolurilor reprezintă un pas spre formalizarea relațiilor generale și tipurile de termeni din domeniul CDI. Versiunea curentă este prima încercare de armonizare a semanticii CERIF la necesitățile și realitățile din domeniul CDI în Republica Moldova. Fiecare termen este legat de cel puțin o schemă de clasificare, în timp ce fiecare termen și fiecare schemă de clasificare sunt identificate prin uuid.

Această versiune este rezultatul cercetărilor efectuate în cadrul proiectului SCIFORM, care au fost prezentate și discutate în cadrul seminarelor științifice săptămânale. La studii și discuții au participat specialiști în domeniul biblioteconomiei, scientometriei, bibliometriei, contabilității, tehnologiilor informaționale precum și angajații CNAA care au adus un aport semnificativ în adaptarea și dezvoltarea semanticii platformei.

Obiectivul semanticii platformei (vocabularul) este recomandarea semanticii formale pentru utilizarea într-un context mai larg al activității de cercetare-dezvoltare-inovare cu ar fi publicațiile, finanțarea, evenimentele științifice etc. de rând cu modelul de date al platformei pentru descrierea entităților și relațiilor între acestea.

Vocabularul semantic este doar o componentă a Modelului complet de date (FDM) al platformei. Documentul în cauză este suplimentat de vocabularul complet descris în fișierul Excel în care sunt formalizați și colectați toți termenii curenți și schemele de clasificare cu care sunt aceștea sunt legați, definițiile, exemplele și descrierile, precum și expresiile de rol, unde a fost cazul.

Fiecare schemă de clasificare și fiecare termen din vocabular are propriul uuid. Atât termenii preluați din CERIF cât și termenii noi sunt prezentați în limba engleză și română.

2. Lista abrevierilor

CDI – Cercetare-dezvoltare-inovare

CERIF – Common European Research Information Format

CNAA – Consiliul Național pentru Atestare și Acreditare

CRIS – Current Research Information Systems

FDM – Full Data Model

IDSII – Institutul de Dezvoltare a Societății Informaționale

3. Componentele de descriere a platformei, versiunea 1.0

- Modelul de date al platformei versiunea 1.0 în format pdf – <https://idsi.md/sciform-livrabile-2016>
- Descrierea tehnică al modelului de date al platformei versiunea 1.0 în format pdf - <https://idsi.md/sciform-livrabile-2016>
- Semantica platformei versiunea 1.0 în format pdf – <https://idsi.md/sciform-livrabile-2016>
- Vocabularul complet versiunea 1.0 al platformei în format xls – <https://idsi.md/sciform-livrabile-2016>

4. Vocabularul semantic

Vocabularul semantic al platformei poate fi privit ca un nomenclator de clasificatoare și însuși clasificatoarele, care sunt utilizate la popularea platformei cu date. Fișierul cu vocabularul complet în forma xls poate fi descărcat de pe pagina proiectului <https://idsi.md/sciform>.

Extras din vocabularul termenilor versiunea 1.0

5. Următorii pași

Semantica platformei și respectiv vocabularul vor fi permanent actualizate și îmbunătățite. Grupul de lucru va continua să urmărească standardul CERIF, precum și unele exemple de bune practici cum ar fi OpenAIRE în vederea armonizării vocabularului semantic al platformei.
