The topics covered are results of research concerned with the quantitative features and characteristics of science. Emphasis is placed on investigations in which the development and mechanism of science are studied by means of (statistical) mathematical methods. The Journal also provides the reader with important up-to-date information about international meetings and events in scientometrics and related fields. Appropriate bibliographic compilations are published as a separate section. Due to its fully interdisciplinary character Scientometrics is indispensable to research workers and research administrators throughout the world. It provides valuable assistance to librarians and documentalists in central scientific agencies ministries research institutes and laboratories. Scientometrics includes the Journal of Research Communication Studies. Consequently its aims and scope cover that of the latter namely to bring the results of research investigations together in one place in such a form that they will be of use not only to the investigators themselves but also to the entrepreneurs and research workers who form the object of these studies.	2.	**Journal of the Association for Information Science and Technology** Până la 01.01.2014 Journal of the American Society for information Science and Technology **ISSN:** 2330-1635 (Print), 2330-1643 (Online) **Ţara: SUA** **Editor:**WILEY-BLACKWELL
