

## Draft Programme

Taking part in the standardization process for new technologies will accelerate the deployment of new networks and services bringing connectivity to cities and towns as well as remote areas. With next generation broadband technologies for example, standards work is lowering the capital cost of deployment in the network core. Participation in standardization activities offers the opportunity for developing countries to jump several generations of technology, and ITU as well as taking into account the needs of these countries in producing its standards will seek to provide assistance in implementing them. The main objective of this workshop is to examine key standardization activities on emerging technologies and actions that countries can take to bridge the standardization gap.

**07 October 2011**

### 09:30 - 10:30 Opening Ceremony

#### Address

- **Orozobek Kaiykov**, Head, ITU Regional Office, Moscow

#### Opening Remarks

- **Vijay Mauree**, on Behalf of Director TSB

### 10:30 - 11:00 Coffee Break

### 11:00 - 12:00 Session 1: Overview of ITU Activities in the Region

Objectives: This session will review the Resolution of WTSA-08, WTDC-10 and the relevant implementation plan. It will also give an overview on the main results of the ITU Plenipotentiary Conference 2010 (PP-10) held in October 2010. An overview of standardization work in ITU-T will be provided.

#### Speakers:

- **ITU Activities for the CIS Region:** Orozobek Kaiykov, Head ITU Regional Office, Moscow
- **ITU Activities on Bridging Standardization Gap:** Vijay Mauree, Programme Co-ordinator, TSB

### 12:00 - 13:00 Session 2: ICT Standardization Challenges in the region

Objectives: This session will address the challenges of ICT standardization in the region and present the standardization capability of countries in the region on the National Standards Capability Scale. The session will also consider strategies that promote standards in the region.

#### Speakers:

- **Resolution 47: WTDC-10 BDT Programme:** Riccardo Passerini, Head Workshops and Promotion Division, ITU, BDT
- **Role of International Telecommunication Testing Centres:** Konstantin Savin, Deputy Director, Technopark ZNIIS, Russia
- **Experience of International Telecommunication Testing Centres in CIS Region:** Konstantin Savin, Deputy Director, Technopark ZNIIS, Russia

### 13:00 - 14:00 Lunch

**14:00 - 16:00 Session 3: Hot Standardization Topics for the Region**

Moderator: Vijay Mauree, Programme Co-ordinator, TSB

**Speakers:**

- **IoT - a new point of ICT development and a tool for improving the human adaptive capacities under the conditions of interaction with the deteriorating man-made environment:** William Sarian, NIIR, Russia
- **Future Networks:** John Visser, Consultant, Canada
- **ITU-T Standardization Activity on Testing:** Konstantin Savin, Deputy Director, Technopark ZNIIS, Russia

**16:00 - 16:30 Coffee Break**

**16:30 - 17:00 Session 4: Conformity and Interoperability**

Objectives: The session will provide information on the WTSA-08 Res. 76, WTDC-10 Res. 47 and the Resolution on conformity and interoperability approved at PP-10. It will present the Conformity and Interoperability programme of ITU.

**Speaker:**

- **Survey of Standardization Capability of Developing Countries:** Vijay Mauree, Programme Co-ordinator, TSB

**17:00 - 17:30 Session 5: Panel Discussion and Closing Session**
